GENERAL SAFETY INFORMATION

1. Make certain that the power source conforms to the electrical requirements of the fan.
2. The power cord is equipped with a three-prong grounded plug that must be inserted into a matching receptacle. Under no circumstances must the grounding prong be cut off the plug. Where a two-prong wall receptacle is encountered, it must be replaced with a properly grounded three-prong receptacle installed in accordance with the National Electrical Code (NEC) and all applicable local codes and ordinances. This work must be done only by a qualified electrician, using copper wire only.

3. Where possible, avoid the use of extension cords. If they must be used, minimize the risk of overheating by ensuring that they are UL listed and of the proper gage and length. Never use a single extension cord to operate more than one fan.
4. Do not insert fingers or foreign objects into the fan. Do not block or tamper with the fan in any manner while it is in operation. Do not touch the fan while in operation or just after it has been turned off, as some parts may be hot enough to cause injury.
5. Unplug power cord before installing or servicing the fan.

WARNING: DO NOT DEPEND UPON THE ON-OFF SWITCH AS THE SOLE MEANS OF DISCONNECTING POWER WHEN INSTALLING OR SERVICING THE FAN. ALWAYS UNPLUG THE POWER CORD.

6. This fan is intended for general use ONLY. It must NOT be used in potentially dangerous locations such as flammable, explosive, chemical laden or wet atmospheres.

WARNING: TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT USE THIS FAN WITH ANY SOLID STATE SPEED CONTROL DEVICE.
