### **Air King Introduces Dual Speed Exhaust Fan for Cost-Effective, Energy-Efficient Ventilation**

WEST CHESTER, PA. – January 2011 – The addition of Air King’s model AK100D dual-speed Quiet Series exhaust fan provides cost-effective, energy-efficient ventilation.

ASHRAE 62.2 ventilation can be accomplished by using the HVI-certified low speed of 50 CFM at 0.5 sones (barely audible) for continuous ventilation of the home and the HVI-certified high speed of 100 CFM at 1.5 sones for times when the room is occupied and in need of additional ventilation power. An electronically balanced centrifugal blower wheel assures maximum ventilation with minimum sound. The low sound level and energy efficient operation of the model AK100D allows the unit to be both ENERGY STAR® qualified and California Title 24 compliant.

The model AK100D features a low profile grill design that almost disappears into the ceiling along with a metal housing and duct collar. A spring-loaded, back draft damper prevents drafts from entering back into the room through the ducting.

“Our AK100D dual-speed exhaust fan adds to our extensive line of ENERGY STAR qualified ventilation products, and provides a perfect ASHRAE 62.2 ventilation solution,” said Jeff Kenkelen, president, Air King.

The model AK100D unit is easy to install, and is UL listed for installation over a tub or shower on a GFCI circuit. It is available in contractor packs of four units.

#### **About Air King**

Air King is a U.S.-based manufacturer of exhaust fans and range hoods as well as commercial and industrial grade high velocity air circulators and other residential building products. Air King utilizes its domestic manufacturing facilities in West Chester, PA, Franklin, TN and Fort Worth, TX along with global sourcing offices to provide high quality products to the residential and commercial markets. Dedication to customer service and producing high quality products is the goal at Air King’s North American engineering, design, and customer support centers located in West Chester, PA and Brampton, Ontario Canada.
