### **Air King Launches ASHRAE 62.2 CEU Course through Hanley Wood University**

West Chester, PA – May, 2017 – Air King is excited to announce the launch of its first continuing education unit (CEU) course through the Hanley Wood University. In conjunction with Hanley Wood, Air King has developed an educational course that explains the components of the ASHRAE 62.2 ventilation standard as well as how to solve for it in residential dwellings.

The course is designed to provide a basic understanding of the various aspects of the standard as well as the pros and cons for the various ways to solve for it. Air King takes you though easy to understand, real world applications. The course includes ways to calculate needed airflow, ways to solve for whole dwelling and local ventilation as well as ways for bringing in outdoor air. In addition the course provides information on cutting edge new solutions for many difficult application problems. After completing the course, attendees will have a solid foundation for how they can solve for ASHRAE 62.2.

Air King president, Jeff Kenkelen says, “There is a lot of confusion out there right now about the ASHRAE 62.2 standard. We are now able to provide an easy to understand course that takes people through the aspects of the standard and allows them to make informed decisions for their specific projects.”

The course is free for all attendees and can be taken at any time of day. At the completion of the course American Institute of Architects (AIA) members will earn one full credit that is reported directly to the AIA.
