FOR IMMEDIATE RELEASE

Air King's DL4 Series Exhaust Fans Recognized as the Most Efficient of ENERGY STAR® 2016.

West Chester, PA – October, 2016 – Furthering its commitment to energy efficiency and indoor air quality, Air King America, LLC announced today that all eight models of the DL4 series exhaust fans have been recognized as the Most Efficient of ENERGY STAR 2016.

The Most Efficient category of ENERGY STAR recognizes products that achieve the highest levels of energy efficiency in their respected categories. In the ventilation category, fans must meet strict criteria for the ratio of airflow (CFM) to energy usage (Watts). In addition to meeting the criteria, Air King exceeded it and the DL4 series currently has the highest CFM/Watt ratio (most efficient) on the market today exceeding the next closest exhaust fan by over 24%*. Air King president, Jeff Kenkelen says, "Being recognized by ENERGY STAR with this honor is a testament to the hard work and dedication our company has to producing high quality, energy efficient ventilation products – we couldn't be prouder."

Exhaust fans from Air King recognized as most efficient include models DL4S, DL4D, DL4SG, DL4DG, DL4SH, DL4DH, DL4SGH, DL4DGH.

The Air King DL4 series can be used to meet local and national codes for indoor air quality including ASHRAE 62.2, CalGREEN, LEED for Homes and more. Each model provides up to 120 CFM of ventilation power with a self-adjusting DC motor that maintains the airflow across multiple static pressures while operating at almost silent sound levels.

Air King America, LLC is an US based manufacturer dedicated to producing high quality, energy efficient exhaust fans and range hoods as well as commercial and industrial grade air circulators. Air King's corporate headquarters and main manufacturing facility are located in West Chester, PA. For more about Air King, LLC visit www.airkinglimited.com.
